W3C HTML Tutorial Report

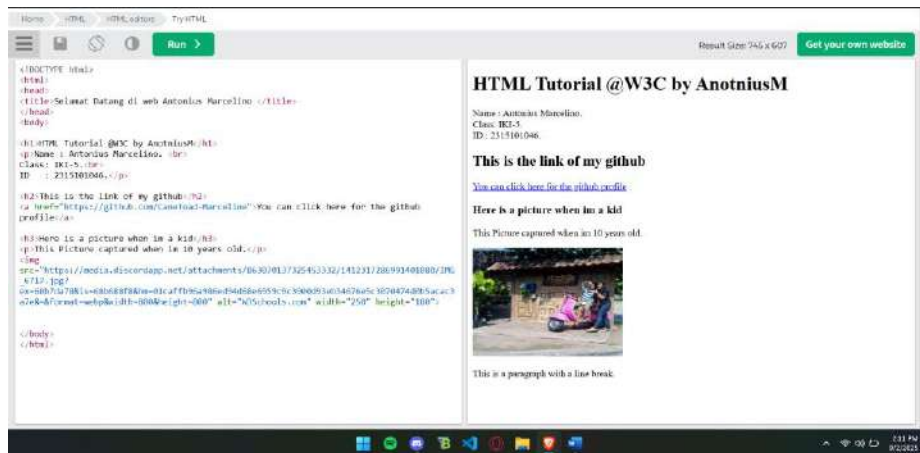

1. Introduction and editors (knowing the Base of HTML and the code editors)

2. HTML Basic (Knowing more about The Heading, Paragraph, Link ref and also image)

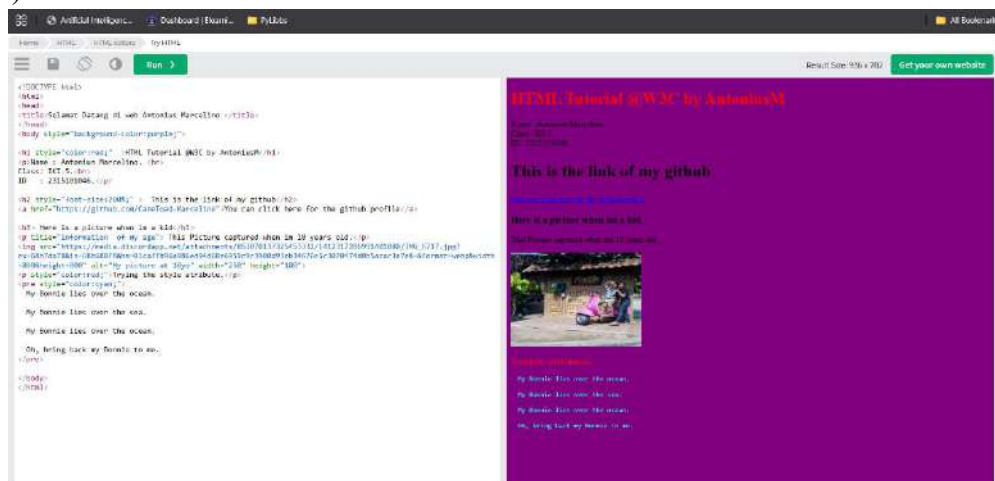

3. HTML Elements (using the Nested Element and break line)

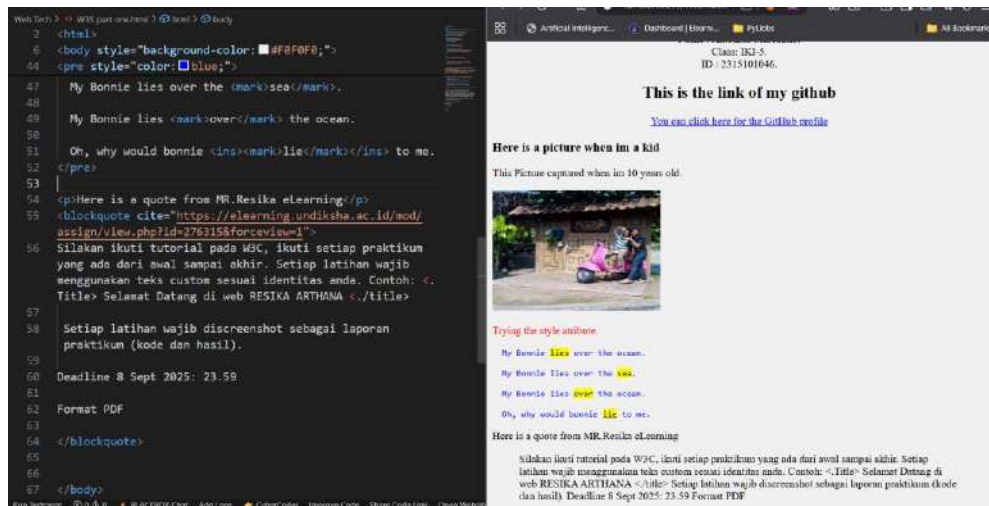

4. HTML Attributes (using the colour attribute to change colour of text)

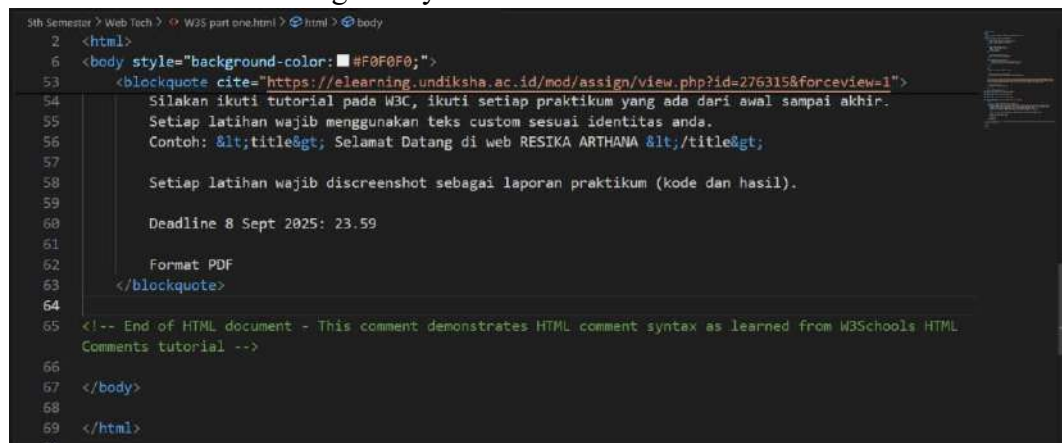

5. HTML Headings, Paragraph and Styles (Messing around with the background and text style)

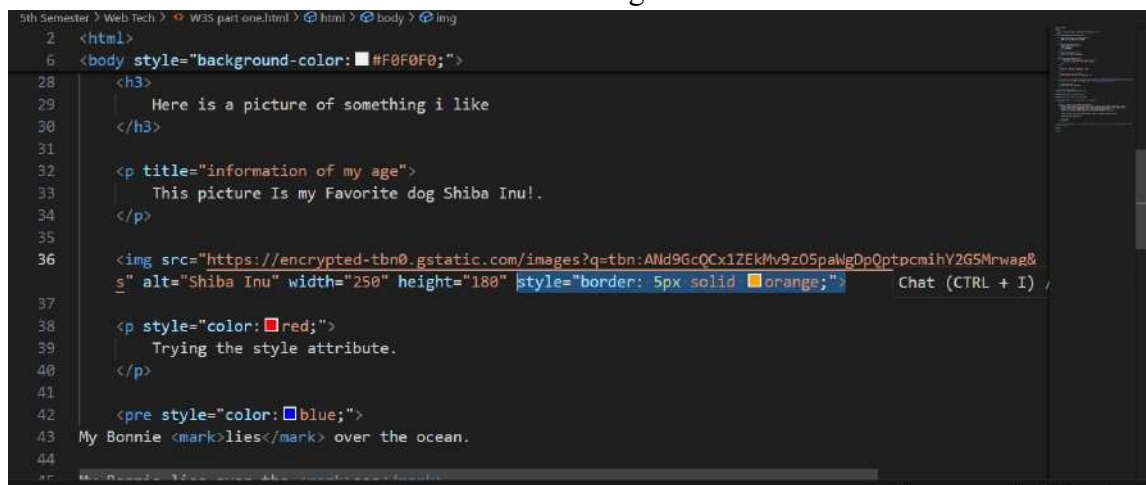

6. HTML Quotation (<blockquote> for Quotations)

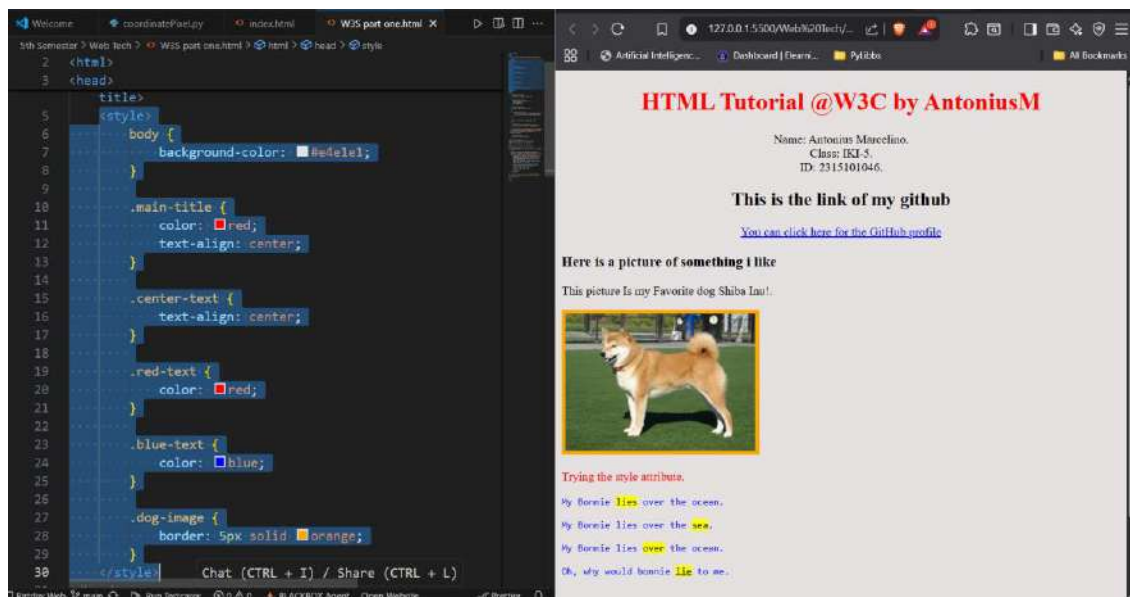

7. HTML Comment <!--using this syntax for comment -->

8. HTML Colour To Make a border around the image

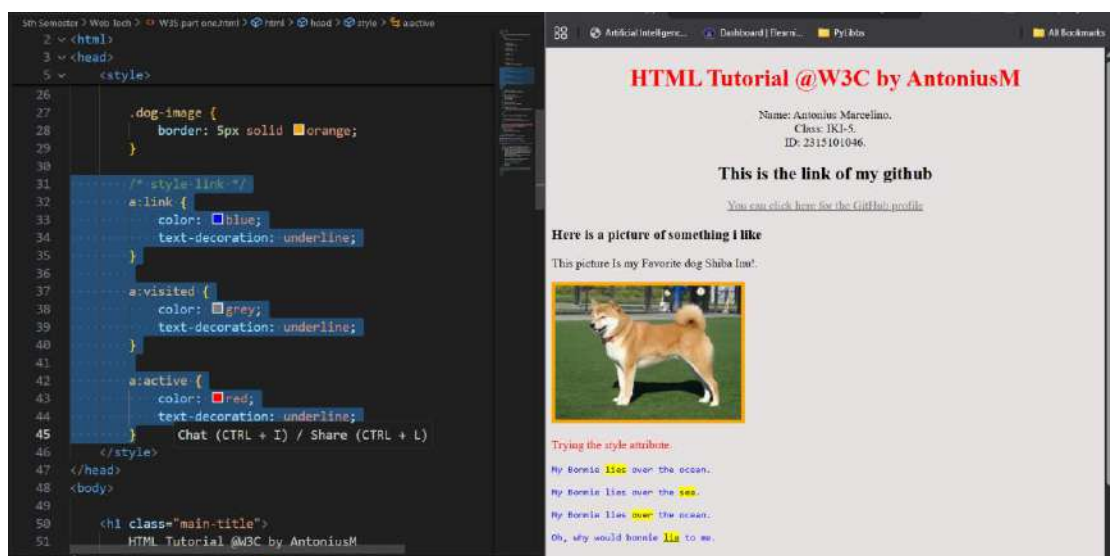

9. HTML Styles – CSS So I convert the code to use the internal CSS which uses class for the styling and can be recalled when used again.

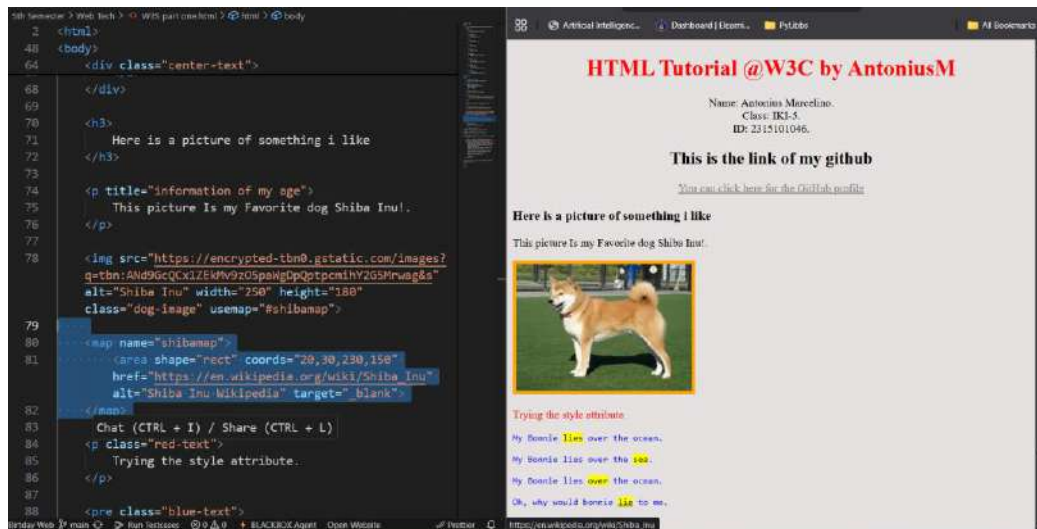

10. HTML Links – Different Colours so I added the CSS to show the link state.

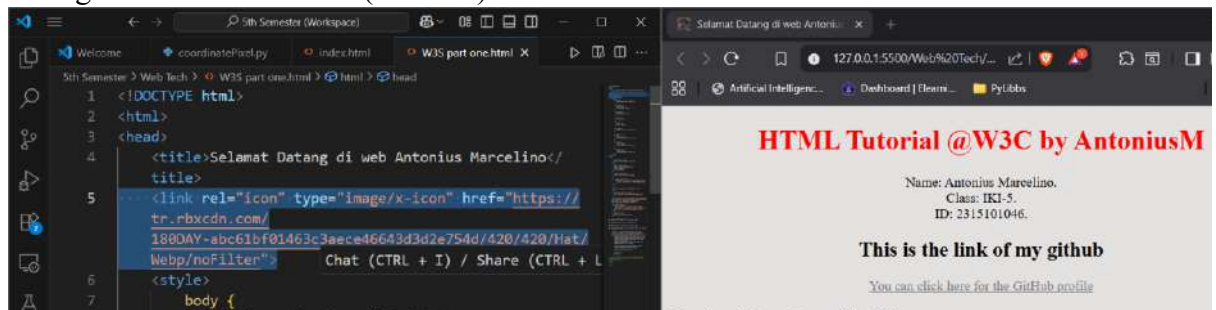

- An unvisited link is underlined and blue
- A visited link is underlined and grey
- An active link is underlined and red

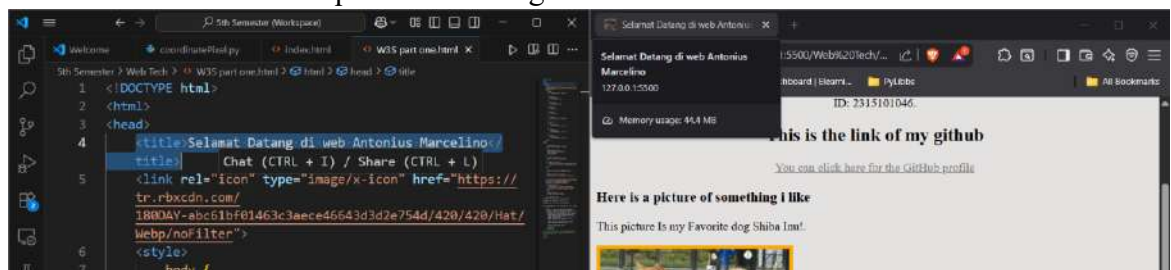

11. HTML Images – Images Map. An image map is an image with clickable areas. So simply a overlay over the object that can be clicked and referencing into a link.

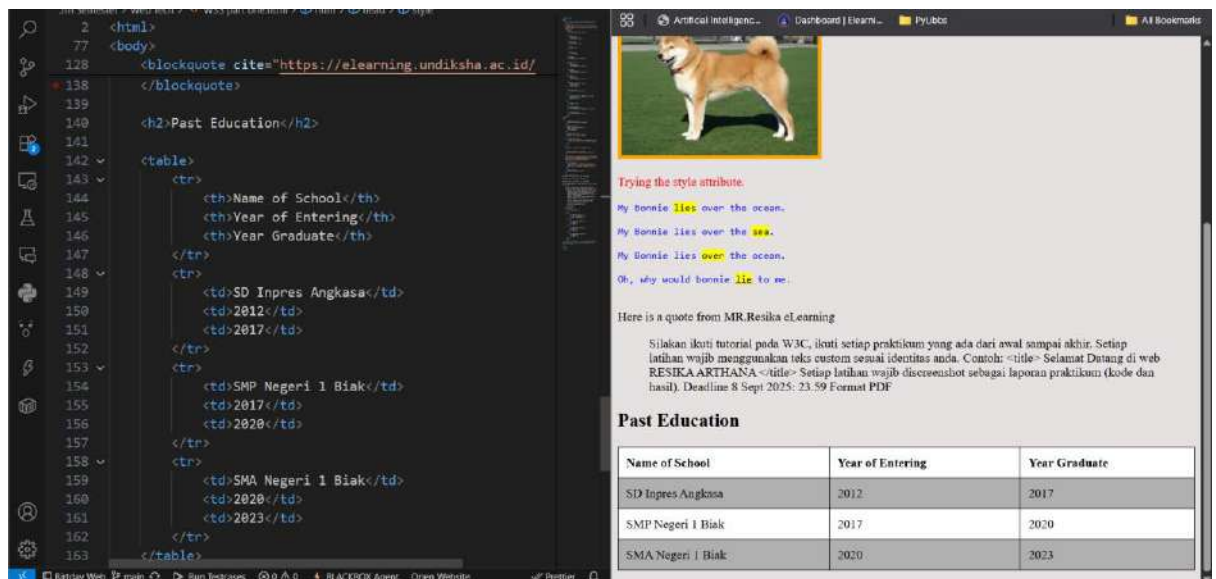

12. Change the icon of website (Favicon)

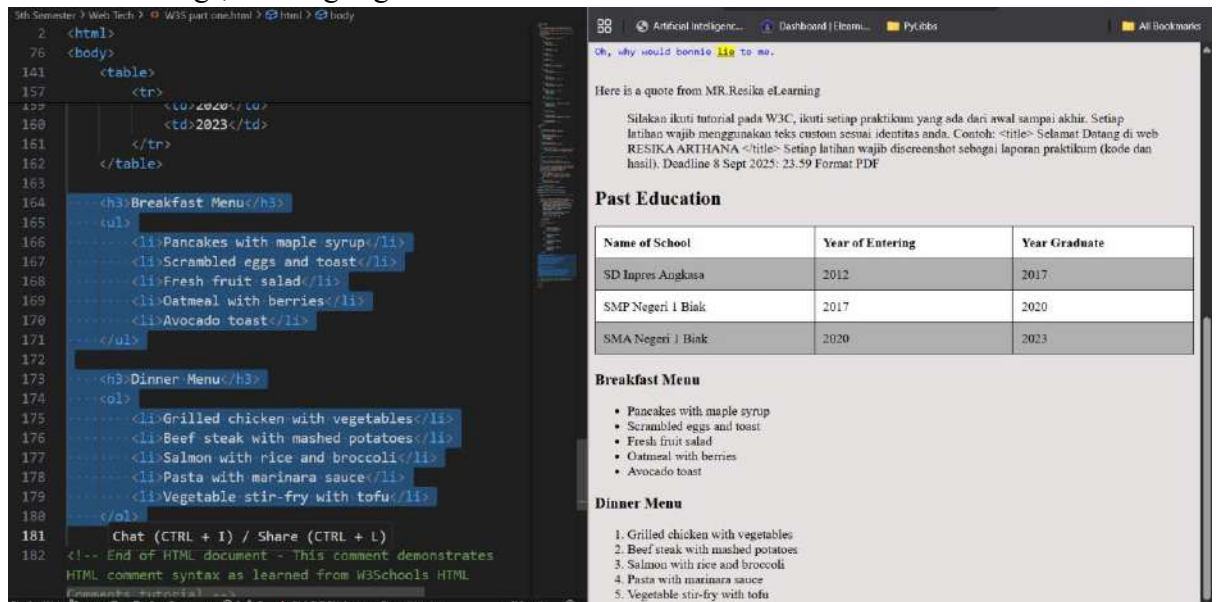

13. Title. Use the title that require in the assignment

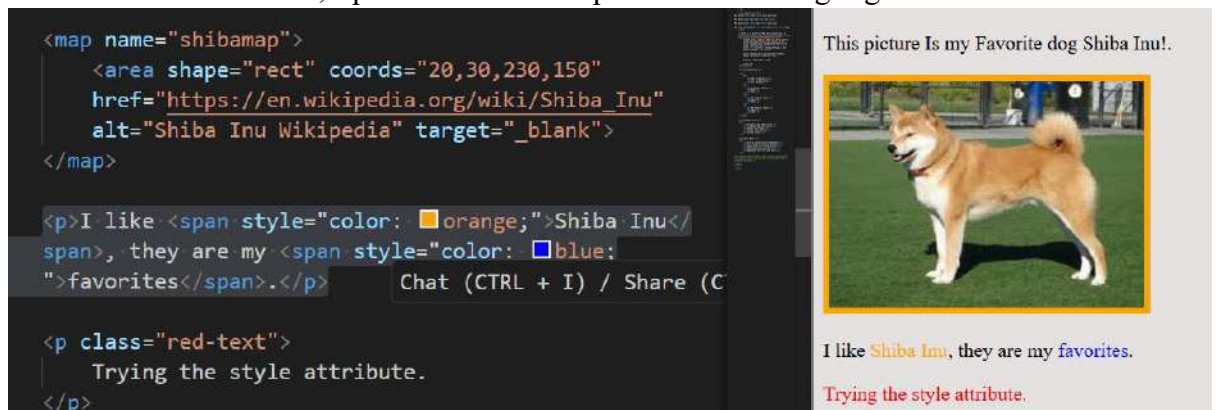

14. HTML Tables – Adding a Table also Internal CSS for the border and background styling

15. HTML List Tags, as it highlighted I make a ordered and un-ordered list of food

16. HTML Block and Inline, Span element. Use span element to highlight the words.

17. HTML Div & Class– Aligning Div element side by side. Creating the CSS and put the list into class

```

186 <div class="menu-container">
187   <div class="breakfast-menu">
188     <h3>Breakfast Menu</h3>
189     <ul>
190       <li>Pancakes with maple syrup</li>
191       <li>Scrambled eggs and toast</li>
192       <li>Fresh fruit salad</li>
193       <li>Oatmeal with berries</li>
194       <li>Avocado toast</li>
195     </ul>
196   </div>
197   <div class="dinner-menu">
198     <h3>Dinner Menu</h3>
199     <ol>
200       <li>Grilled chicken with vegetables</li>
201       <li>Beef steak with mashed potatoes</li>
202       <li>Salmon with rice and broccoli</li>
203       <li>Pasta with marinara sauce</li>
204       <li>Vegetable stir-fry with tofu</li>
205     </ol>
206   </div>
207 </div>
208 </div>
209
210 <!-- End of HTML document - This comment demonstrates

```

Oh, why would borrie lie to me.

Here is a quote from MR Resika eLearning

Silakan ikuti tutorial pada W3C, ikuti setiap praktikum yang ada dari awal sampai akhir. Setiap latihan wajib menggunakan teks custom sesuai identitas anda. Contoh: <title> Selamat Datang di web RESIKA ARTHANA </title> Setiap latihan wajib discreenshot sebagai laporan praktikum (kode dan hasil). Deadline 8 Sept 2025: 23.59 Format PDF

Past Education

Name of School	Year of Entering	Year Graduate
SD Inpres Anglata	2012	2017
SMP Negeri 1 Biak	2017	2020
SMA Negeri 1 Biak	2020	2023

Breakfast Menu

- Pancakes with maple syrup
- Scrambled eggs and toast
- Fresh fruit salad
- Oatmeal with berries
- Avocado toast

Dinner Menu

- Grilled chicken with vegetables
- Beef steak with mashed potatoes
- Salmon with rice and broccoli
- Pasta with marinara sauce
- Vegetable stir-fry with tofu

18. HTML id attribute. Changing the Main Title into a unique ID from a class

```

2 <html>
3 <head>
4   <title>
5   <link rel="icon" type="image/x-icon" href="https://tr.rbxcdn.com/188DAV-abc61bf91463c3aece46643d3d2e754d/420/420/Hat/Webp/noFilter">
6   <style>
7     body {
8       background-color: #e4e1e1;
9     }
10
11     #main-title {
12       background-color: #bdbdbd;
13       color: red;
14       text-align: center;
15       padding: 20px;
16       border-radius: 8px;
17     }
18     .center-text {
19       text-align: center;
20     }
21

```

Here is a picture of something i like

This picture is my Favorite dog Shiba Inu!

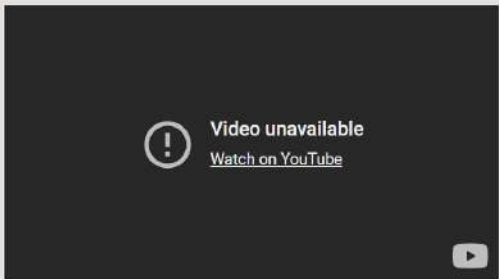

19. HTML IFrame. Used to make a frame that can directly referencing to a web in a smaller screen or page.

```

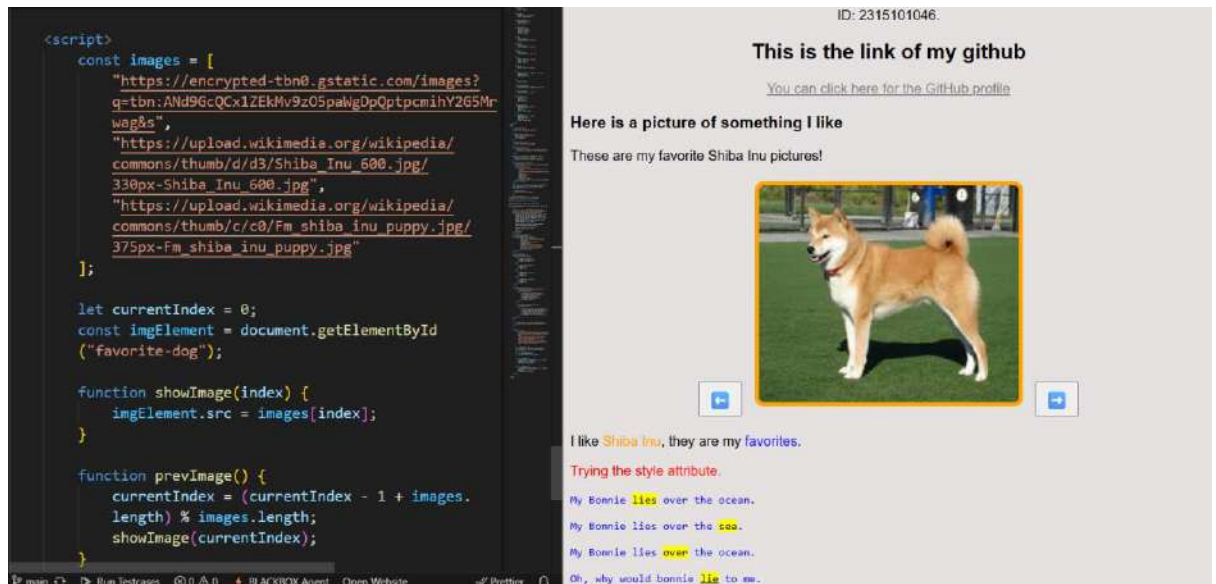

<h2>My Favorite Video</h2>
<div style="text-align: center;">
  <iframe width="560" height="315"
    src="https://www.youtube.com/embed/dQw4w9WgXcQ"
    title="YouTube video player"
    frameborder="0"
    allow="accelerometer; autoplay; clipboard-write; encrypted-media; gyroscope; picture-in-picture"
    allowfullscreen>
  </iframe>
</div>

```

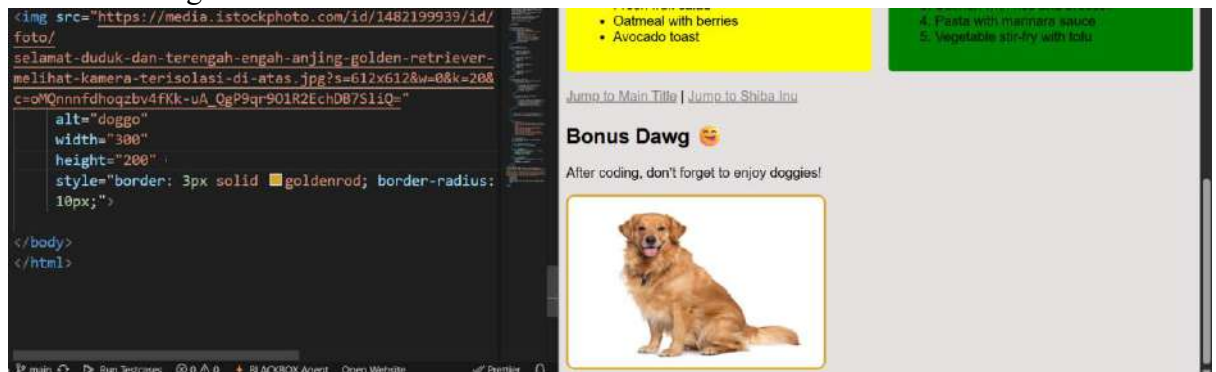

My Favorite Video

20. HTML JavaScript. I made a script that able to change the images attribute.

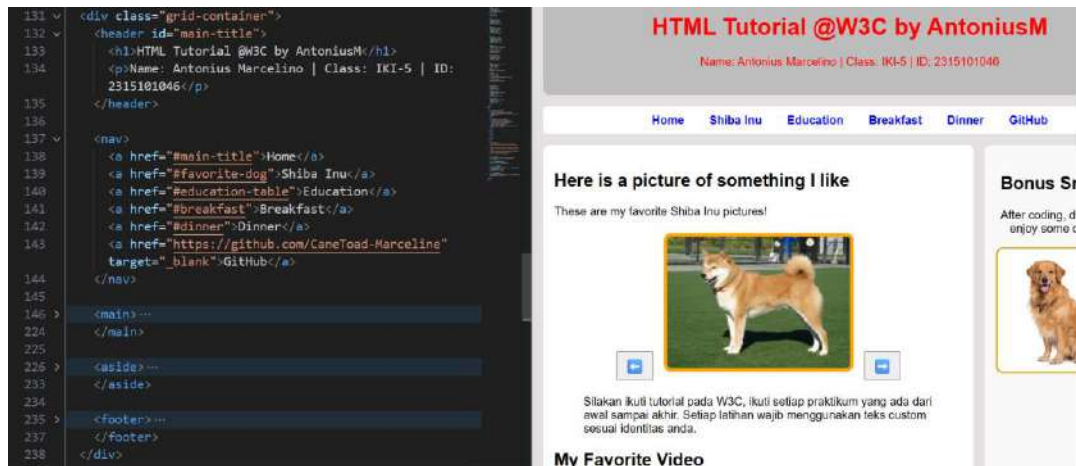

21. HTML Pathing.

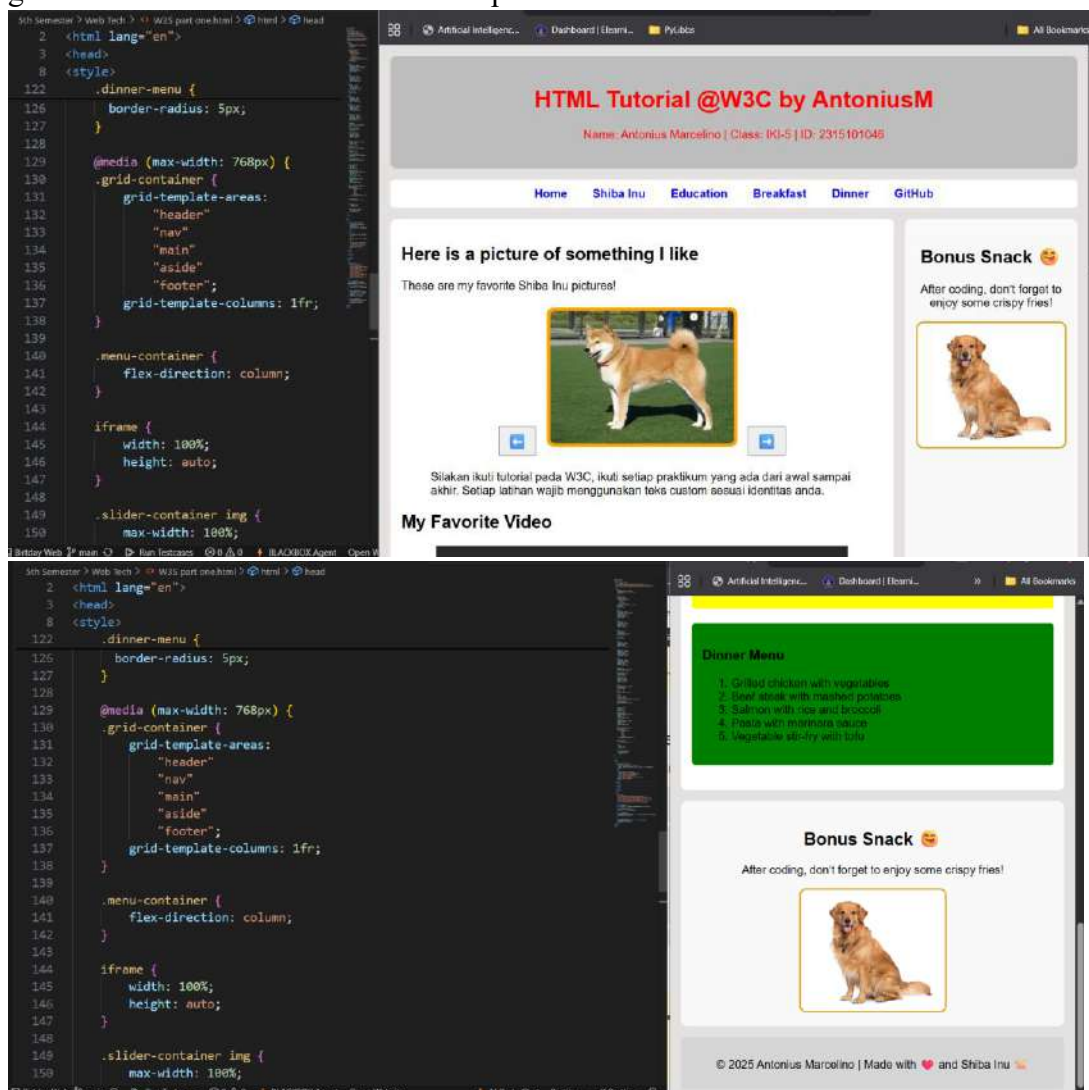

22. Setting The Viewport. Using viewport so the user's visible area of a web page. It varies with the device.

23. HTML LAYOUT – I used the Grid Layout for this time (header, nav bar, main content, side content and footer)

24. HTML responsive web design using media queries. We add a CSS styling to make the grid stacked underneath when its compacted

In the 2nd image, the side page get automaticly put down.

25. HTML Computer Code Element displaying code snippets using `<code>` within a `<pre>` like style
